CHALLENGES

- Lack of visibility and transparency in the property listing process
- Handling documents offline
- Digital document sign-off for all the parties involved
- Multiple levels of communication going untracked

SOLUTION

Application that lists a selling property like classifieds, finds an appropriate buyer, facilitates buyer and seller agents to handle all legal documentation inside the same application transparently with the help of task managing workflow.

TOOLS & TECHNOLOGIES

Ensuring highest priority to quality of software, and also the security of customer data.

Tools
- Adobe XD
- Miro
- Notion
- Adobe Illustrator

Front-end
- Angular
- Angular Material
- Prime NG

Back-end
- Python
- Flask

BENEFITS

1 **Automation**

Entire buying and selling process is automated thereby reducing manual efforts drastically.

2 **Transparency**

Brings visibility to both buying and selling parties with structured process tracking.

3 **Mobile-friendly**

Provides for easy readability, usability, speed of loading and easily navigable.
